Education

Arya College of Engineering & I.T.

B.Tech — Computer Science & AI/ML Engineering

Aug 2024 – May 2028

Jaipur, Rajasthan

- **CGPA: 9.27 / 10.0** — Consistently among top academic performers in the department
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Artificial Intelligence, Java Programming
- **HackNexus 2.0 Core Coordinator** — Coordinated registrations, team communications, and notifications for **50 teams and 200+ participants** across a **24-hour** intercollegiate hackathon; managed **4+ team operations** throughout full event duration under faculty supervision
- **Conference Paper Presenter** — Co-authored and presented “A Survey of Mobile Cloud Computing Architectures and Services” at International Conference, Arya College, in association with Association of Engineers Rajasthan

Experience & Projects

Context-Aware Modular AI Chatbot | Python, NLP, Custom State Management, OOP

GitHub | 2024

- Built a multi-turn conversational agent from scratch without relying on third-party black-box APIs, prioritizing deep understanding of system internals over shortcut integrations
- Engineered custom state management system using Python dictionaries to track context across **3+ conversation states** and **10+ entity types** per session with intelligent topic-switching logic
- Delivered V2 with **4 modular component upgrades** including enhanced memory handling; V3 roadmap planned with advanced intelligence layers and persistent context storage
- Structured with strict separation of concerns — each of **5+ independent modules** is separately testable, replaceable, and documented with clean READMEs on GitHub

Time-Locked Wallet — Stellar Blockchain | Soroban, Rust, Stellar Testnet, Smart Contracts

GitHub | 2025

- Designed and launched a Soroban smart contract on Stellar Testnet implementing conditional time-locked fund release logic with on-chain validation
- Resolved **6+ compilation, environment configuration, and deployment iterations** to achieve successful live contract execution
- Demonstrated applied blockchain development skills outside formal coursework through self-organized peer learning group of **4 students**
- Live Contract ID: C_BG_VD_MI_EQ_BE_VB_G5_DA_Z5_LC₃X₇R_WB_VI_W6_EC₆V_BH_M5_EW_W3_A6₇P_TW_U5_RY_ER_B

NeuraLog — Personal Intelligence & Memory Assistant | Python, Local LLMs, GraphRAG, In Development | 2025

System Design

- Architecting a privacy-first personal intelligence assistant using locally deployed quantized Small Language Models (SLMs) — no external cloud API dependency for sensitive data
- Designing GraphRAG-based knowledge persistence layer across **3 core memory modules** to prevent context drift and maintain coherent long-term memory across multi-session conversations
- Applying production-grade system design principles: **modular interfaces, scalable component boundaries**, and local deployment performance constraints
- Flagship portfolio project targeting end-to-end AI system design capabilities for career positioning in AI/ML engineering roles

Achievements

- **GFG 60-Day NPCI DSA Challenge — Score 260** | *GeeksforGeeks × NPCI, Feb–Apr 2025*
 - Maintained a **60-day consecutive** streak without missing a single problem; solved problems across **8 topic areas** including Arrays, Trees, Graphs, Dynamic Programming, and Bit Manipulation

- Cracked **4+ Hard problems** on first attempt with **100% accuracy** including Burning Tree, Articulation Points, Minimum K Consecutive Bit Flips, and K Sum Paths
- Independently derived Catalan numbers from first principles on Day 31 without prior knowledge of the formula — later confirmed as a **200-year-old** mathematical sequence
- Documented entire journey across **60 public LinkedIn posts**, building a learning brand around pattern recognition and depth-first thinking
- **Anthropic Academy — AI Fundamentals & Prompt Engineering** | *Anthropic, 2025*
 - Enrolled in all **13 structured courses**; scored **10/10** on **2 completed** assessments
 - Following disciplined weekly schedule mapped through **June 2026** across full curriculum

Technical Skills

Languages	Python, Java, C++, C, SQL, HTML/CSS
DSA	Arrays, Linked Lists, Stacks, Trees, Graphs, Dynamic Programming, Greedy, Backtracking, Monotonic Stack, Union-Find (DSU), Trie, Binary Search, Sliding Window, Two Pointers — 28 patterns
AI / ML	Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Generative AI, Local LLMs, GraphRAG, State Management, Prompt Engineering
Tools & Platforms	Git, GitHub, VS Code, Tableau, Jupyter Notebook, Stellar Testnet, Soroban, React (basics), FastAPI (basics)
Concepts	System Design, Modular Architecture, Production-Ready Systems, Privacy-First Design, Context Persistence, OOP, REST APIs

Certifications & Programs

- **Anthropic Academy — AI Fundamentals & Prompt Engineering** | *Anthropic* 2025
- **AI Fundamentals** | *IBM* 2024
- **Python for Data Science** | *IBM* 2024
- **MongoDB Associate Developer** | *MongoDB* 2024
- **Data Analytics Job Simulation** — Tableau dashboard + Excel pay equity analysis | *Deloitte via Forage* Mar 2025
- **Infosys Springboard AI Program — 120+ hours** covering Deep Learning, NLP, Computer Vision, Generative AI | *Infosys* Jan–May 2025
- **Problem Solving Through Programming in C** | *NPTEL / IIT* 2025
- **Database Management Systems** — 9/12 weeks | *NPTEL / IIT* 2025
- **Java Programming** — 9/12 weeks | *NPTEL / IIT* 2025
